

# MOTOR CIRCUIT GUIDE

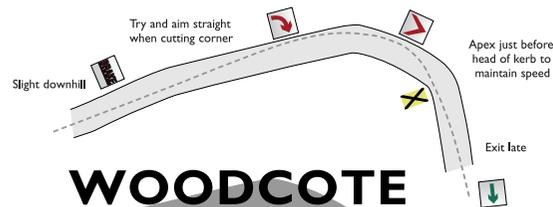

Please note: the annotations on this circuit map including notes on braking points, turning points, speed and the racing line are intended as basic guidelines only. They should not be considered a definitive guide to driving at Goodwood. All drivers should begin their day with a number of familiarisation laps, before slowly building up their speed. Only when a driver feels comfortable with the layout of the circuit should they begin high speed laps. If a driver is unsure of any aspect to do with the motor circuit or the track events table they should consult with an instructor or Duty Track Steward. Thank you.
